**SKILLS**
**Java** - Strong; **Python** - Moderate
**ReactJS** - Basic; **AWS** - Basic;
**MicroServices** - Basic;

## CAREER OBJECTIVE

To Kickstart My Career As A Java Developer And Relentlessly Pursue Mastery In Java-Based Technologies Within A Dynamic Organisation. Committed To Continuous Learning, I Aim To Contribute My Passion And Dedication To Drive Innovation And Excellence In Software Development.

## RELEVANT WORK / PROJECT EXPERIENCE

**INTERNSHIP**  **Trempplin**                                                                  March 2024  - Till Date

.Working on Flexcube having Knowledge on SQL , PLSQL  And Done Implementation of Weblogic
. Evaluating the logs and fixing the bugs

**INTERNSHIP**  **IonIdea Interactive Pvt. Ltd.**                                      Oct 2023   -Feb-2024

- Worked on development of web-application employing PHP, MySQL
- Working on Pyhton development Automation project Along with Database and Rest API

VS Code

**INTERNSHIP**  **Welkins Soft Tech Pvt.Ltd - Software Developer**           May 2023 - Jun 2023

**Smart Quotation Management System**
- Worked on the development of a web-application employing React, Python, and MongoDB.
- The project's objective was to craft a resilient and dynamic web application that harnessed the capabilities of these technologies to deliver an enriched user experience and streamline data management.
- Through the utilisation of React, Python, and MongoDB, a cutting-edge solution was created for quotation management, elevating user experiences and enhancing data handling efficiency.

**PROJECT**  **FoodSaver: A Mobile Solution For Food Waste Reduction, App Developer**                     2023
- A mobile application designed to combat daily food wastage is available for download by any citizen. Users can capture food images, and with a single click, the location is allocated and stored in the database.
- This information is subsequently retrieved by representatives of food organisations, who then proceed to collect the food and distribute it to those in need. This approach addresses the difficulties faced by these organisations, including location, timing, and quantity considerations.
- The end result is a significant reduction in food wastage, contributing to a more sustainable approach to food resource utilisation.

Java    Firebase    android studio

**PROJECT**  **GuardianMilk: Detecting Milk Adulteration With IoT And Data Analysis**                     2023
- Food adulteration of milk is the focus of this project, where the addition of adulterants to any pure substance results in harmful changes to its content, endangering human health.
- Data is processed to determine whether the product in question is acidic or basic and to quantify the extent of adulterants added.
- By employing IoT and data analysis techniques, the project safeguards consumers by identifying and quantifying milk adulteration, ensuring the purity and safety of the product.

ARDUINO    ThingSpeak

**PROJECT**  **Aqualife App, Software Developer**                     2021
- The mobile application, used in COVID situations, facilitates the delivery of drinking water for people with disabilities, ensuring their basic needs are met through the ordering of water cans at specific times.
- Drinking water delivery for individuals with disabilities is enabled by this mobile application, offering a solution during COVID situations, with the option to order water cans at designated times.
- In COVID situations, the delivery of drinking water for people with disabilities is made possible through the mobile application, which allows for the ordering of water cans at specific times, addressing essential requirements in the community.

## QUALIFICATIONS

### BMS Institute Of Technology And Management
Feb 2021-Nov 2023
- MCA Degree - 8.33 GPA
- Mobile App Development - 96%

### Basaveshwar Science College
May 2019 - Sep 2021
- BCA Degree - 76.36%
- Advanced Java Programming - 85%
- C# Programming - 97%
- C Programming - 98%

## ADDITIONAL SKILLS & INTERESTS

**Language:** Kannada - Native; English - Fluent;  Hindi - Near Fluent;  Telugu - Conversational
**Music:** Expert Tablist
**Sport:** State Level Basketball Team, Zonal Cricket Player, Kabaddi
